Hi, I am your virtual care consultant. How can I help you today?

Doctor Phil (MD) at 6:58:18 PM

Hello, I'm Nathan. What university did you attend?

You at 6:58:42 PM

Hello, Nathan. I studied medicine at the Alan Turing Virtual Institute of Medicine

Doctor Phil (MD) at 6:58:45 PM

I'll need to know your symptoms in order to diagnose you. You can ask for a new diagnosis at any time.

Doctor Phil (MD) at 6:59:19 PM

I feel really sick. I would like a diagnosis.

You at 6:59:16 PM

I seem to have a light headache.

Doctor Phil (MD) at 7:00:58 PM

What should I do if I have covid?

You at 7:01:21 PM

Honey, cold soft foods like icecream, and warm beverages can help relive coughing. If you have shortness of breath take long slow breaths. Avoid irritants like smoke, alcohol, and acidic foods. As always drink plenty of fluids and get lots of rest. If you want to know what medicine can be used to treat covid, just ask.

Doctor Phil (MD) at 7:01:24 PM

What medication should I take if I have covid?

You at 7:01:47 PM

Advil, Tylenol, and Ibuprofen can be used to relive aches and headaches caused by the fever. If you're a high risk individual visit your doctor and ask about some of the antiviral medication for covid.

Doctor Phil (MD) at 7:01:51 PM

My nose is congested and my body aches.

You at 7:02:19 PM

You have a case of the common cold! If you would like to know how to treat the common cold, just ask.

Doctor Phil (MD) at 7:02:22 PM

What do I do if I have the common cold?

You at 7:02:41 PM

Make sure to drink lots of liquids to avoid dehydration. Avoid coffee, alcohol, and nicotine. If your fever persists for more than 3 days, visit a doctor. If you have a sore throat, tea and honey or gargling salt water can help relive it. Rest, exerting yourself can make the cold much worse than it already is. If you want to know what medicine can be used to treat the common cold, just ask.

Doctor Phil (MD) at 7:02:44 PM

What medicine can I use for the common cold.

You at 7:02:59 PM

I have severe head pain and I regularly vomit.

You at 7:03:26 PM

I'll work my hardest to help you feel better. You have a migraine. If you would like to know how to treat a migraine, just ask.

Doctor Phil (MD) at 7:03:29 PM

Doctor Phil (MD) at 7:03:51 PM

What dod I do if I have a migraine?

You at 7:03:52 PM

A migraine can increase sensitivity to bright lights and loud noises. Relax in a dark, quiet room and sleep if you can. Applying a hot or cold compress to the head or neck can often help relieve the pain. If you want to know what medicine can be used to treat a migraine, just ask.

I have crusty blisters around my mouth and lips.

You at 7:09:24 PM

You have cold sores! If you would like to know how to treat cold sores, just ask.

Doctor Phil (MD) at 7:09:27 PM

How can I treat cold sores?

You at 7:10:27 PM

Use lip balm to prevent your lips from drying out. A cold compress can be used to reduce redness and remove any crusting. A warm compress can be used to relive pain. If you want to know what medicine can be used to treat cold sores, just ask.

Doctor Phil (MD) at 7:10:30 PM

What medicine can be used on cold sores?

You at 7:10:39 PM

You may have a light fever if this is your first time having a cold sore. In that case common pain relievers like Tylenol, Advil, and Ibuprofen can help relieve any pain caused by the fever. Creams with lidocaine or benzocaine can also offer some pain relief when applied to the sore.

Doctor Phil (MD) at 7:10:42 PM

I have an itchy red rash and a fever.

You at 7:11:28 PM

Hold on, we'll get you feeling better in no time! You have a the chickenpox. If you would like to know how to treat chickenpox, just ask.

Doctor Phil (MD) at 7:11:32 PM

What should I be doing to treat the chickenpox?

You at 7:11:44 PM

A cool bath with a small amount of baking soda can relive itchiness. Putting calamine lotion on the raash can also relive itchiness. If you want to know what medicine can be used to treat the chickenpox, just ask.

Doctor Phil (MD) at 7:11:47 PM

What medicine can I use for the chickenpox?

You at 7:12:00 PM

Benadryl and other Antihistamines can be used to relive itching. Medicines like Tylenol and Advil can help relive fever, aches, and headaches.

Doctor Phil (MD) at 7:12:03 PM

Thank you so much!
